Cal State Fullerton

Modernizing PDF Accessibility – CSU Approach

Jan 27, 2026

Willie Peng, AVP Academic Technology, IT

California State University, Fullerton

About the California State University System

- Nation's Largest four-year public university system
- 23 campuses and seven off-campus centers across the state of California + Chancellor's office
- Educates more than 460,000 students each year
- Most diverse student bodies in the United States
- Offers more than 4,000 degree programs that align with the workforce demands

PDF Accessibility development timeline

Mar. 2025

AWS shared the PDF remediation app at the CSU CIO Council

Apr.–June 2025

Engagement with ASU CIC team

Setup POC account (AWS)

Inquired Adobe API

Deployed ASU CIC backend and frontend code

Core Feasibility test

July–Sep. 2025

Inquired other university enhancement and scalability approach

Campus enhancement requirement gathering

Enhancement code build out

Evaluate EntraID & Shibboleth SSO feasibility

Initial Alpha release (POC)

Oct. 2025

Provisioned Fullerton Instance

Requirement gathering for Admin Page

UI Accessibility Review - EEAAP

Nov. 2025

Soft Launch Fullerton Instance

Provisioned and deployed CSU Instance

Dec. 2025

Production launch (Fullerton instance)

Soft launch CSU instance

Increased Adobe API RPM capacity

Released Admin / Role Management

Implemented Google Analytics

Added PDF App to Chancellor's Office ATI Toolkit

Jan. 2026

CSU instance production release announcement

Grant PowerUser, ATI user Role

Feb. 2026 forward

Code Clean up, release to GitHub

Update UI to be accessible

ACCESSIBLE TECHNOLOGY INITIATIVE

PDF Accessibility Remediation

On April 24, 2024, the Department of Justice (DOJ) published a new rule on digital accessibility under Title II of the Americans with Disabilities Act (ADA). This rule requires the University's web content, including academic course content, to be accessible and meet the mandated technical standards by April 24, 2026

This service is part of the ATI Remediation Framework. It uses AI to handle a significant amount of PDF accessibility work and can often produce a more usable document, although not fully compliant. Results vary based on the complexity of the file, and some documents will still need targeted adjustments. For additional guidance or manual remediation, users can contact their campus ATI lead.

Feature Added

- Single Sign-On (Entra ID, Shibboleth)
- Quota based User Role
- Bulk File upload
- Accessibility Report
- File Retention / Retrieval
- Admin / User Role Management / Stats
- Increase Adobe API Request Per Minute (RPM) Limit
- Google Analytics

Acknowledgements

ASU CIC provided the initial PDF remediation app and code

AWS team connected the groups and the technical support

Adobe provided the API, insights, bump up RPM

CSU Chancellor's Office supported the IdP SSO, ATI team

CSUF Development Team: Dhusdee Chandswang, Ken Wuttisasiwat, Eve Jirapornsirikul

Many more that contribute to the success of this rollout
